

Hello, neighbors.

Herculaneum has begun repairs on Festus-Horine Road. Public works director Mark Johnson says work will take about two weeks.

Expect one lane of traffic to be closed at the repair sites.

There are two major sections of broken pavement on the road in front of Stonewater. The first is across from electrical boxes just inside the Herky maintenance area, near the intersection with Rolling Stone Boulevard. That section will be the first repaired.

Weather permitting, city crews will tear out pavement this week. They then will restore in roadway base and cap the section with concrete.

The second section is close to the Stonewater Boulevard entrance. Like the first section, asphalt will be removed, the base material will be replaced and augmented, and a concrete cap poured.

Festus-Horine Road will be resurfaced, including the stretch within the Herculaneum city limits, in the next year or so by the Festus Special Road District. Funding for that work is being addressed, and project completion depends on how soon the district gets a grant to cover the cost.

The district repaired Cherry Lane/Main Street and Front Street in Horine last summer. The result is a much improved roadway on Stonewater's main access to Hwy. Z. Festus-Horine work will repair aged sections of asphalt. Herculanum maintains Festus-Horine within its boundaries, which are within the plotted areas of Stonewater Subdivision. Festus-Horine repairs are being done under an agreement with the city.

These projects are not being paid for by Stonewater residents' annual dues.

## A wing and a sprayer

Now in operation in the retention pond at Rolling Stone and Watering Stone, an aeration pump was needed for water appearance and quality. Gone are algae and stagnant water. The pond now provides eye appeal and a fishing opportunity. Fishing is for residents and guests only

Thanks to those who stocked the pond. Missouri regulated game fish and pan fish line bluegill are welcome additions to the pond. Please do not put invasive species like carp in either the retention pond or the lake.

## Last word

Notice of annual homeowners dues will be delivered soon. The \$350 fee is due by March 31. Direct questions to Ernst Management Services, 314-221-4380.

As a reminder, Stonewater is in Herculanum, which provides water, sewer, trash and police services. City regulations apply if not covered by Stonewater HOA covenants, which all homeowners are under legal obligation to follow if homes were purchased after Nov. 4, 2011.

Stonewater is not in the city of Pevely. It is in the Pevely ZIP code that was established long before Herculanum annexed the subdivision.
